Dear Hiring Manager,

I am writing in regards to the Intern Position you have posted. I looked through the requirements that are mentioned and find that my skill set will allow me to perform well. I have experience with front end aspects of web development and frameworks such as AngularJS (and currently learning React) and making websites responsive with Bootstrap and Materialize. I am an avid learner and can pick up new conventions and technologies when necessary. I have experience with working in team collaboratively over github.

I feel I am a good fit for this position and my strengths and qualifications are demonstrated through the projects I have up on my portfolio. I have a wide knowledge ranging from developing responsive web apps through both LAMP Stack and Mean Stack. I am capable of setting up and configuring Databases such as MongoDB and MySQL. I am familiar with the full development cycle of a small scale website. Experienced with working on web apps alone as well as with other developers.

I am confident I can bring a strong work ethic and mentality and look forward to discussing this position with you in more detail. Thank you for your consideration.
